F7 EMAIL SECURITY-AS-A-SERVICE

"STOP EMAIL-BASED ATTACKS IN THEIR TRACKS WITH F7 EMAIL SECURITY-AS-A-SERVICE"

F7Digital

F7 Digital Email Security-as-a-Service (ESaaS) protects many email-based threats, such as spam, phishing, malware, and ransomware. With F7 Digital ESaaS, organizations can outsource their email security to F7 Digital, which can provide around-the-clock monitoring and management of email security systems. It allows organizations to focus on their core business activities while ensuring that their email communications are secure and protected from cyber threats. F7 Digital ESaaS is important for all-sized businesses needing more resources or expertise to manage their email security infrastructure. By outsourcing email security to a third-party provider, these organizations can benefit from enterprise-level protection and expertise at a fraction of the cost of building and maintaining their email security infrastructure.

CHALLENGES WITH IN-HOUSE EMAIL MANAGEMENT

EXPERTISE

Small and medium-sized businesses may struggle to implement effective email security controls due to a lack of expertise and resources, making it challenging to detect and prevent advanced email-based attacks.

COST

Building and maintaining an email security infrastructure can be expensive. It requires investing in solutions and ongoing up keeping and monitoring. The cost of hiring and training personnel to manage email security is also high.

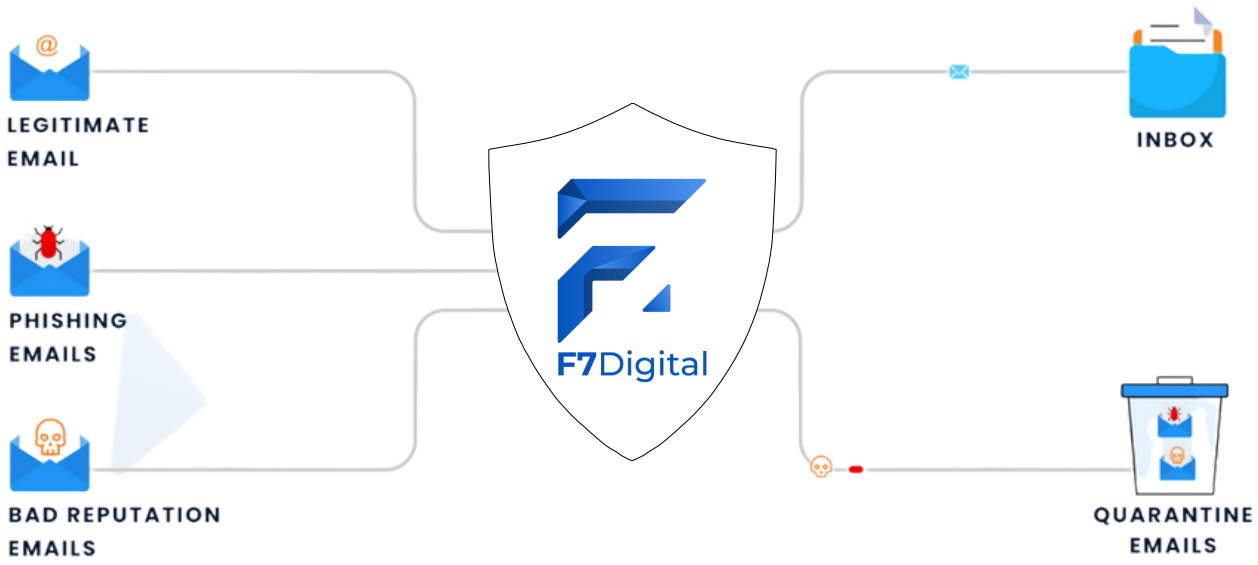
TIME

Managing email security can be a time-consuming process, taking valuable resources away from other critical business activities. This is especially true for monitoring and responding to email-based threats, which require constant attention and analysis around the clock

EVOLVING THREAT LANDSCAPE

Email-based threats are constantly evolving and becoming more sophisticated, making it difficult for in-house teams to keep up with the latest attack techniques and prevention methods.

HOW DOES F7 EMAIL SECURITY AS A SERVICE WORK?



BENEFITS OF EMAIL SECURITY AS A SERVICE

F7 Digital Networks offers an AI-powered and multi-layered email security framework that prevents unwanted emails from reaching users' inboxes. This solution covers a complete range of email threat vectors, including spoofing, anomalies, phishing, shadow IT, malware UBA, and OLP. The system provides recommendations for improving the security posture based on the analysis of corporate email traffic. F7 Digital Networks also ensures compliance with local data privacy laws and offers custom audit reports. The company provides weekly/monthly/quarterly SOC governance calls, a 30-minute GOLD SLA, and a dedicated 1800-SOC number.
