F7 MDR-AS-A-SERVICE

"UNCOVER THREATS & PROTECT YOUR IT INFRASTRUCTURE WITH F7 MDR"

F7Digital

F7's Managed Detection and Response-as-a-Service (MDR-as-a-Service) offers a comprehensive security solution that utilises industry-leading Enterprise-Grade Active EDR technology. This technology combines AI-powered prevention, detection, response, and threat-hunting capabilities to protect user endpoints, containers, cloud workloads, and IoT devices. With F7's MDR, you can access turnkey security cost-effectively, as it is more affordable than hiring a single security analyst.

CHALLENGES WITH IN-HOUSE EDR

> ***Lack of expertise:*** EDR requires specialized knowledge and skills to set up, configure, and maintain. Without an in-house team of experts, it cannot be easy to leverage an EDR solution's capabilities fully.

> ***Limited resources:*** Managing EDR in-house can be resource-intensive, requiring significant time and effort to keep systems updated and configured properly.

> ***Keeping up with the threat landscape***: EDR requires monitoring and analyzing large amounts of data from various sources, including endpoints, network traffic, and other security tools. Keeping up with the ever-changing threat landscape can be a daunting task.

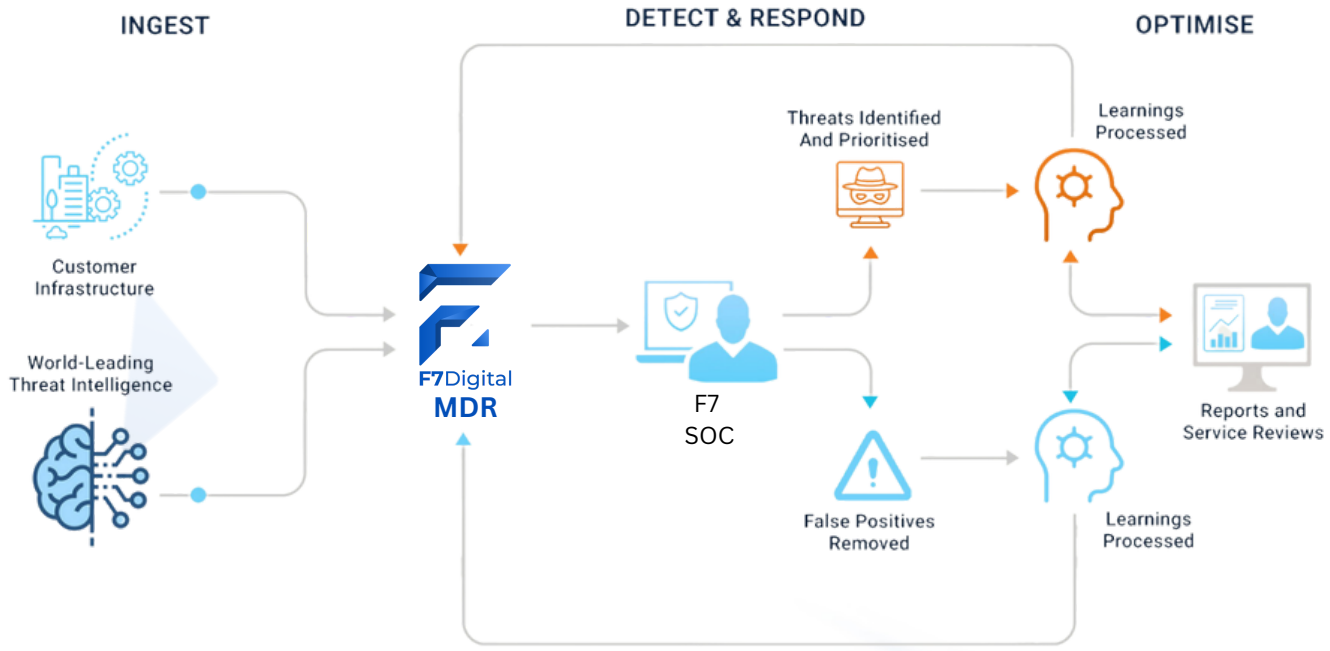
> ***Scalability:*** EDR solutions can be complex and difficult to scale, which can be a challenge for growing organizations or having many endpoints to protect.

> ***Integration and Automation:*** EDR should ideally integrate with other security tools and systems, such as SIEM, IDS, and firewalls, to provide a more comprehensive security posture. Automation is also important for handling large data sets and reducing human effort. ▪ Cost: Implementing, configuring, and maintaining EDR solutions in-house can be costly due to the need for hardware, software, and personnel.

WHY F7?

- ▸ A SOC 2 TYPE II AND ISO 27K CERTIFIED SOC
- ▸ INDUSTRY BEATING PRICED PREMIUM QUALITY MDR SERVICE
- ▸ 300+ CUSTOMERS ACROSS 10+ COUNTRIES
- ▸ GLOBAL MDR SOC LOCATIONS
- ▸ EDR SOLUTION AGNOSTIC SERVICE
- ▸ MONTH-TO-MONTH SUBSCRIPTION
- ▸ FIXED MONTHLY FEE (NO NICKEL-&-DIME!)
- ▸ NO EXTRA CHARGES FOR DEPLOYMENT AND ONBOARDING
- ▸ FULLY-MANAGED TURNKEY/- CO-MANAGED OPTIONS
- ▸ 15-MIN GOLD SLA
- ▸ GDPR AND LOCAL PRIVACY LAWS COMPLIANT

HOW DOES F7 MDR-AS-A-SERVICE WORK?



BENEFITS OF F7'S 24X7 MDR SERVICE

F7 24X7 MDR Service is an advanced cybersecurity solution offering endpoint detection and response (EDR), next-generation antivirus (AV), and behavioral analytics to detect and prevent cyber threats such as ransomware, APTs, and zero-day attacks. The service provides proactive threat hunting, triage via IOC repositories, and digital forensics investigations (DFI) to analyze and respond to incidents effectively. It also provides network and device control policies, customizable network isolation, and USB/Bluetooth device control to prevent lateral movement attacks. Overall, F7 24X7 MDR Service is a comprehensive cybersecurity solution that helps organizations strengthen their security posture.
