F7 MFA-AS-A-SERVICE

"PROTECT YOUR IDENTITY, STRENGTHEN YOUR SECURITY WITH F7'S MFA-AS-A-SERVICE"

F7Digital

MFA (Multi-Factor Authentication) as a Service is a cloud-based service that provides additional security for user authentication by requiring multiple methods of verification, such as a password and a security token/OTP/Notification.This service is offered by F7 to simplify the deployment and management of MFA for their customers.

DID YOU KNOW?

- MFA CAN REDUCE THE RISK OF A DATA BREACH BY 99.9% WHEN COMPARED TO ONLY USING A PASSWORD
- MFA CAN REDUCE THE RISK OF A SUCCESSFUL CYBER ATTACK BY OVER 80%
- COMPANIES THAT IMPLEMENT MFA EXPERIENCE A DECREASE IN SUCCESSFUL PHISHING ATTACKS BY OVER 90%

BENEFITS OF USING MFA-AS-A-SERVICE

>**Enhanced security**: Adds a second layer of authentication, making it harder for attackers to access sensitive information.

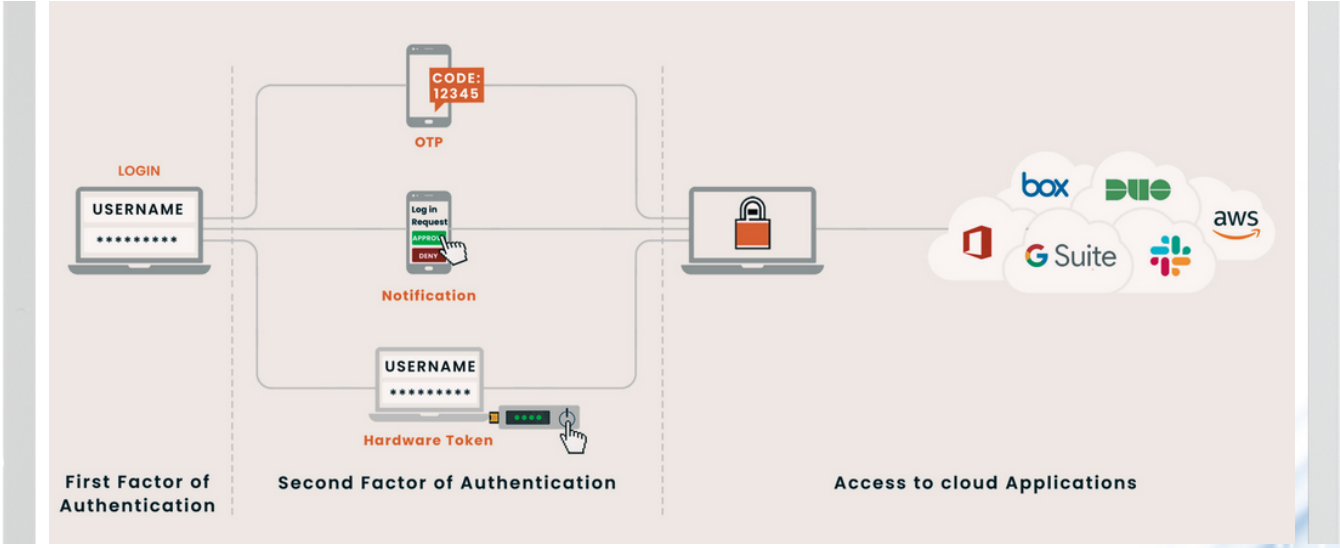
>**Easy implementation**: MFA as a Service can be quickly and easily added to existing authentication systems, reducing implementation time and costs.

>**Scalability**: The service can be scaled up or down to meet changing security requirements.

>**User convenience**: MFA can be delivered through various methods, including mobile apps, SMS messages, and security keys, providing a convenient experience for users.

>**Improved compliance**: MFA can help organisations meet regulatory requirements for secure authentication.

HOW MFA-AS-A-SERVICE WORKS



BENEFITS OF MFA-AS-A-SERVICE

>Expertise: Service providers have specialised knowledge and experience in MFA, providing a higher level of security.

>Cost-effectiveness: Outsourcing eliminates the need for in-house infrastructure and personnel, reducing costs.

>Scalability: Service providers can easily scale the MFA solution to meet changing business needs.

> Focus on core business: Outsourcing allows organisations to focus on their core business and leave the management of MFA to the experts.

>Reliability: Service providers have established processes and systems to ensure uptime and reliability.

>Time-Saving: Outsourcing eliminates the need for internal IT staff to manage and maintain the MFA solution, freeing up time for other tasks.

>Improved security: Service providers can provide the latest MFA technology, keeping organisations more secure than relying on in-house solutions.
