F7Digital

VULNERABILITY MANAGEMENT, DETECTION, AND REMEDIATION

>**Scan**: Runs continuous scans to get visibility
>**Detect**: Detects deviations and changes as they occur
>**Analyse**: Analyses systems for issues, risks, and threats
>**Remediate**: MFA can be delivered through various methods, including mobile apps, SMS messages, and security keys, providing a convenient experience for users.
>**Automate**: MFA can help organisations meet regulatory requirements for secure authentication.
>**Prevent:** MFA can help organisations meet regulatory requirements for secure authentication.

ALL THIS TURNKEY SECURITY COMES AT A STARTING PRICE LESS THAN WHAT IT WOULD TAKE YOU TO HIRE A SINGLE SECURITY ENGINEER.
